

Conditional Probability Examples And Solutions

Conditional Probability Examples And Solutions *FREE* conditional probability examples and solutions Examples Conditional Probability ams sunysb edu Examples Conditional Probability Definition If $P(F) > 0$ then the probability of E given F is defined to be $P(E|F) = \frac{P(E \cap F)}{P(F)}$ Example 1 A machine produces parts that are either good 90 slightly defective 2 or obviously defective 8 Pro Conditional Probability Dartmouth College new probability for an event F the conditional probability of F given E and denote it by $P(F|E)$ Example 4 1 An experiment consists of rolling a die once Let X be the outcome Let F be the event $\{X \leq 6\}$ and let E be the event $\{X > 4\}$ We assign the distribution function $f(x) = \frac{1}{6}$ for $x = 1, 2, 3, 4, 5, 6$ Thus $P(F) = \frac{1}{6}$ Now suppose that the die is rolled and we are told that the event E has occurred This Conditional Probability and Tree Diagrams Conditional Probability and Tree Diagrams Example Let us consider the following experiment A card is drawn at random from a standard deck of cards Recall that there are 13 hearts 13 diamonds 13 spades and 13 clubs in a standard deck of cards I Let H be the event that a heart is drawn I let R be the event that a red card is drawn and Week 2 Conditional Probability and Bayes formula Week 2 Conditional Probability and Bayes formula We ask the following question suppose we know that a certain event B has occurred How does this impact the probability of some other A This question is addressed by conditional probabilities We write $P(A|B)$ the conditional probability of A given B Probability and Conditional Probability pages stat wisc edu The conditional probability of an event given another is the probability of the event given that the other event has occurred If $P(B) > 0$ $P(A|B) = \frac{P(A \cap B)}{P(B)}$ and $P(B|A) = \frac{P(A \cap B)}{P(A)}$ With more formal notation $P(A|B) = \frac{P(A \cap B)}{P(B)}$ if $P(B) > 0$ The vertical bar represents conditioning and is read given $P(A|B)$ is read The probability of A given B Probability Probability Conditional Probability 19 33 Conditional Probability Homework Solutions Conditional Probability Homework Solutions 1 Because of air pollution in some cities on days when the air pollution index is very high people should not exercise outdoors Sam lives in a city where the probability of the being to exercise outdoors on any randomly chosen day is $\frac{9}{10}$ Henry lives in a city where the probability of being 4 Conditional Probability courses cs washington edu conditional probability Conditional probability of E given F probability that E occurs given that F has occurred "Conditioning on F" Written as $P(E|F)$ Means "P E given F observed" Sample space S reduced to those elements consistent with F i.e. $S \cap F$ Event space E reduced to those elements consistent with F i.e. $E \cap F$ Solved Problems Conditional Probability Solution In my town it is rainy one third of the days Given that it is rainy there will be heavy traffic with probability $\frac{1}{2}$ and given that it is not rainy there will be heavy traffic with probability $\frac{1}{4}$ If it is rainy and there is heavy traffic I arrive late for work with probability $\frac{1}{2}$ Conditional Probability solutions examples games videos Conditional Probability The probability of an event occurring given that another event has already occurred is called a conditional probability Recall that when two events A and B are dependent the probability of both occurring is $P(A \text{ and } B) = P(A) \times P(B|A)$ given A or $P(A \text{ and } B) = P(A) \times P(B|A)$ If we divide both sides of the equation by P
